nice to meet you

Pottery pots is a global brand with Dutch roots, developing and selling high quality planters and related products, from jumbo pottery to small accessories and from glossy to rough finishes.

The company has its headquarter, showroom and warehouse in Aalsmeer, the Netherlands. The North and South American market is operated from our showroom and warehouse in Burlington, New Jersey and our showroom in Atlanta, Georgia. We also have a warehouse in Vietnam.

Since our foundation in 2008 we aim for an extensive assortment that is based on the belief that design should be available for everyone. That is why we are always looking for the perfect balance between design, quality and price. Every pottery pots product is designed from a simple but clever perspective. We believe in basic forms and shapes, without thinking of it as boring. This no-nonsense way of thinking and designing is assigned to the Dutch identity, and is widely known as 'Dutch design'.

To give you a complete overview of all the collections and products we sell, we proudly present to you this brand-new catalog that displays our assortment in a clear and fresh manner. Would you like to experience our assortment even more? Please visit one of our showrooms and let us help you find the right solution for your project!

material overview

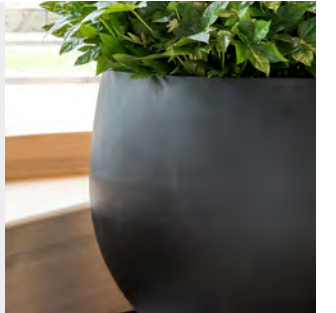

We aim for an assortment that is made from durable materials that will last indoor and outdoor. Most of our products are made from fiber-based materials; a material that has the looks of the precious natural stone, but with the advantage that it is lightweight and low in maintenance. Are you looking for a more sophisticated appearance? Then we would recommend our sandstone assortment; a strong material with very fine lines obtained by sand grains.

natural

fiberstone

The natural collection is a large collection of basic and design planters all recognizable for their natural finish. All items in this collection are made from the strong material fiberstone. The look and feel are almost indistinguishable from real and more expensive natural stone. Because of the various sizes there will be a solution for any place.

* The black finish in this collection is not uv resistant. Keep it black with our maintenance oil. See pg. 125.

earth

fiberstone

Bring the beauty of mother earth into any interior or garden with the earth collection of pottery pots. Square shaped pots are inspired by the rugged motif of the salt flats of Bolivia, while the round shapes with subtle structures give the feeling of strolling in a Moroccan desert. The fiberstone material and UV resistant coating allows to place the earth collection in any climate. The earthy colors provide a serene and natural appearance.

platinum

fiberstone

The platinum collection is, as the name indicates, the most exclusive collection within the pottery pots range. The platinum finish is unique in combination with our strong fiberstone material. This is a collection of purely eye-catching luxury pots made from high quality material with an exceptional finish.

Please note: the items in this collection are for indoor use only and should not be exposed to direct sunlight.

urban

ficonstone

We think this would be the outcome when the rough meets the modern. The urban collection brightens up every space and is a 'not to be missed'. The medium to outsized planters come in three different well-known pottery pots shapes: the orb, the patt and the charlie. The unique concrete finish does its work well both outside and inside.

cement

ficonstone

The cement collection is a small collection of bestsellers in a special finish. The finish of the planters feels like a newly plastered wall. The smooth finish with uneven color shades, give the products in this collection their cool and contemporary look. The robust ficonstone material is suitable for both indoor and outdoor and can therefore be placed in any environment.

ridged

ficonstone

The ridged collection is a classic collection with round shaped pottery and planters available in all kinds of small and basic sizes. The pots have a delicately ribbed surface which makes them sturdy but elegant classics. The characteristic planters from the ridged collection are made from ficonstone and can be used both indoors and outdoors.

raw

ficonstone

Modern shapes with a tough character. Say hello to the raw collection, an assortment of pots we cannot ignore. The raw collection is at its best in a spacious environment where it can stand on its own. But, it also fits perfectly in a more characteristic décor, because we all know opposites attract. The sprayed-cement finish and deep rusty color give this collection a unique appearance.

rough

fiberclay

The rough collection is the rebellious one of the pottery pots family. With its 'less is more' mentality, the rough collection focuses on the tough character of the pot. The collection, with a fiberclay basis, consists of modern planters with the same characteristic finish in many different colors.

A large, dark grey, textured rectangular planter sits on a lawn. It is filled with several large, perfectly spherical artificial green bushes. In the background, there are real green trees and a building with a tiled roof. To the right of the planter, there are purple flowers and green foliage.

artificial plants

plastic & polyester

Looking for an easy boost for your pottery pots planter? Decorate your interior or exterior with our artificial plants. They come in a variety of shapes and sizes. This range is very practical for quick projects or customers without green thumbs. The best bit is that, except for an occasional dusting, there is no maintenance needed.

use & care

Our use and care range offers various products to maintain or upgrade your Pottery Pots planters. Most of our products can be used both indoors and outdoors. When products are placed outdoor a special outdoor treatment is required. The use and care accessories keep your products in the best condition possible.

instructions

indoor

- Cover the inside with a water-resistant inner tray or pond liner.
- Put the planter in the right place.
- Fill the planter with 1/3 of clay pebbles. These contribute to the water management and make sure that your plants grow better.
- Then fill the planter with 2/3 of potting soil and place the plant in the planter.
- Lastly you can choose to cover the soil with a decorative layer of clay pebbles, bark chips or groundcover plants.
- After filling the planter, we recommend not to replace the planter. The weight of the clay pebbles and the potting soil could cause damage to the planter.

outdoor

- Drill holes in the bottom of the planter. Use a 8-10 mm metal/wood drill.
- Drill several holes, the number of holes depends on the size of the planter. Document available upon request.
- Cover the holes with mesh, to make sure the soil cannot clog the holes.
- Make sure that planters without feet do not directly make contact with the subsurface. Loose feet prevent this or a plant saucer can be used.
- If you directly place a planter without feet on the subsurface, we recommend to drill the holes at the side of the planter instead of in the bottom. This best can be done 5 to 10 cm above the ground.
- A piece of duct tape placed where you want to drill the hole, will help keep the drill bit from slipping.
- Fill the planter with 1/3 of hydro grain. The hydro grains contribute to the water management and make sure that your plants grow better.
- Then fill the planter with 2/3 of potting soil and place the plant in the planter.
- Lastly you can choose to cover the soil with a decorative layer of hydrograin, bark chips or groundcover plants.
- After filling the planter, we recommend not to replace the planter. Theweight of the hydro grain and the potting soil could cause damage to the planter.

Use the pot feet to lift the planter from the ground, to allow the water to drain away from the pot. Make sure the pot has drainage holes when using the planter outdoor.

Turn your planter into a pillar or use the topper as a decorative plateau.

The saucer can either be used as a decorative addition to your pottery pots planter, or to collect excess water as it drains from the planter.

and more objects

Make your planters easy movable with the special pot wheels. The wheels can be used in combination with the drainage pipe to make sure the water leaves the planter at the desired area. For both indoor and outdoor use.

our container program

From our factory in Vietnam full containers can be shipped directly to their destination. Compose the container with the collections you would like to sell and have the possibility to customize the products (e.g. add drainage holes). In this way you can save time and increase your margin!

If you have any questions or if you would like to receive the digital pricelist, please get in touch with us.

*Don't have enough storage space for a container full of stock?
The container program is also possible for purchasing groups.
Bundle your forces and compose a container together!*
